

PAR Lighting Fixtures

At Creative Stage Lighting, quality and innovation are a way of life. It's no surprise that when we introduced our Touring Edition PAR in 1993, we brought to market a fixture line designed to meet and exceed the highest standards in the industry. It is a fixture that will easily withstand non-stop touring. Our PAR 64 was the first to feature a louvered rear cap to minimize light spill, keeping unwanted light out of the truss and off of the ceiling. When you need a fixture for the most demanding situations, count on our Touring PAR for dependability and lasting quality.

All Around, Better Fixtures

CSL Touring PAR Features

- Cap Retaining Cable**
Enhanced Safety
- Rolled Cap and Barrel Edges**
Safe, smooth access for focusing
- Contoured Yoke**
Faster focus in Pre-Rig Truss
- Louvered Rear Vents**
Minimizes light spill
- Reinforced Safety Screen**
Enhanced Safety
- Heavy Gauge Body**
Easily withstands tough touring conditions
- Spring Loaded 4th Clip**

Altman® PAR

Economical and versatile, the Altman range of steel PAR luminaires offer maximum flexibility. With an oval shaped beam and a lamp range from 120 to 1000 watts, Altman PAR fixtures are a low cost design solution for use in concerts, nightclubs, television and architectural applications. Intensities and beam spreads are a function of the lamps selected for use in each fixture. One unit can serve multiple purposes simply by changing the lamp. The die-cast Star Par is a rugged, lightweight alternative to conventional PAR 64 luminaires. The highly polished reflector is designed to operate most efficiently with the new generation of 575 watt lamps.

ETC® Source Four PAR

The Source Four PAR and PARNel feature a rugged die-cast aluminum construction and the acclaimed Source Four lighting technology. Source Four delivers a smooth even field, and at 575 watts is comparable to a 1000W PAR64-while saving 40% on energy. Changing beam angles is easy: Source Four PAR's come with a set of four snap-in lenses that mount in a rotating ring. PARNel, with its wave lens design and focusing knob, lets you access a range of 25 to 45 degrees, providing a soft, symmetrical spot or flood like a fresnel. For use with 375W, 575W or 750W lamps.
